Far East	Paul Monroe
Latin America	Peter H. Goldsmith
Women's Colleges	Virginia Newcomb
International Relations Clubs	Margaret C. Alexander

PREFACE

The Institute is desirous of keeping the administrative authorities of our colleges and universities informed of the presence of visiting scholars, educators and commissions, partly for their information and partly because it has received requests to suggest distinguished foreigners who happen to be in the United States as commencement orators. Hence Part I of the bulletin.

It is likewise desirable that the students of our institutions of higher education should have as full information as possible of fellowships which permit traveling or research in foreign countries. Part II gives information about some recently founded fellowships for American students abroad but does not claim to be exhaustive. Many of these fellowships have already been awarded for the next scholastic year. The information will be valuable, however, for the future.

A number of inquiries have come to the Institute regarding the possibility of securing foreign teachers for lectureship or to fill temporary vacancies in our institutions. In order to discover the willingness of such teachers to come to the United States a questionnaire was issued by the American University Union in Great Britain and France. Part III of the bulletin gives the answers of those which are most definite as to time, place and subject.

Many inquiries have come to the Institute from American students regarding research possibilities abroad, particularly in France and Great Britain. It may be said generally that the French universities will be able to accept American students in practically any numbers. This is also true of the provincial universities in Great Britain. Oxford and Cambridge are more crowded and cannot, therefore, receive students in all subjects. A resumé of the answers received, particularly from the universities of Oxford, Cambridge and London, make up Part IV of the bulletin.

A booklet entitled *Opportunities for Higher Education in France* has been distributed to all the accredited colleges and universities and to organizations interested in educational cooperation with France. A similar bulletin, giving fuller particulars of *Opportunities for Graduate Study in the British Isles*, has just come from the press and is in process of distribution.

STEPHEN P. DUGGAN
Director

PART I

(a) *Foreign Professors who will arrive in the United States this spring, and who will be open for lecture engagements*

Sir Geoffrey Butler of Cambridge University

Lecturer at Cambridge University on international law and author of *A Handbook to the League of Nations*. Associate of Mr. Balfour on the British High Commission to the United States.

Sir Harry Reichel, LL.D., Vice Chancellor of the University of Wales

He will be available for a certain number of lectures during the first three weeks of August.

The subjects of his lectures:

The Influence of Sea Power on History

The Growth of the Turkish Power and its Relation to Western Civilization

Mr. Graham Botha, Archivist of Cape Colony

Available as commencement speaker

Subject: The Union of South Africa

Dr. W. van Bemmelen, Director of the Royal Magnetic and Meteorological Institute at Weltevreden, Batavia

The Netherlands Minister announces that Dr. vanBemmelen is expected to arrive on the Pacific Coast the end of April and will probably reach the East by the end of May. He will devote part of his stay here to the diffusion of knowledge of a scientific nature about the Netherland East Indies, more especially about the mountains and mountain ranges of the archipelago. He is on his way from Java to Holland. Dr. vanBemmelen will be glad to lecture without compensation.

(b) *Foreign Professors who will arrive in the United States this spring, not available for lectures*

A group of distinguished representatives of the medical profession from England, France, Scotland and Canada, arrived in New York on April 19, to study methods of medical education and particularly to be present at an examination given by the National Board of Medical

Examiners. They include Sir Humphrey Rolleston and Colonel H. J. Waring, appointed by the Royal College of Surgeons of England and also representing the Conjoint Examining Board of England; Dr. Norman Walker of Edinburgh, representing the Triple Qualifications Board of Scotland; Professors Desmarais and Roussy of France, appointed by the Faculty of Medicine, University of Paris, and Dr. J. C. Connell of the Dominion Council of Medicine of Canada. The Mission will visit the larger medical centers of the east and middle west and attend the meeting of the American Medical Association in New Orleans, arriving in Philadelphia at the examination of the National Board on May 19 to 26.

Mr. Marc Peter, Swiss Minister to the United States, states that a Swiss Commission on Economic Studies, consisting of about sixty members, will come to the United States early in May. The Commission will be made up mainly of persons interested in educational matters, who are desirous of making a study of the educational system, schools and libraries of this country.

The Royal Institute of Public Health, London, has been invited to hold its Congress in Brussels from May 20 to May 24. The Council of the Royal Institute, in view of the obvious desirability of a closer relationship between the United States and Great Britain in the promotion of all health measures, has extended a cordial invitation to the universities of the United States, as well as to the municipal authorities and Learned Societies, medical and otherwise, interested in the various departments of public health and preventive medicine, to appoint delegates to the Congress. Professor William T. Sedgwick of the Massachusetts Institute of Technology will represent the Institute at this conference.

The Swedish geologist, Baron De Geer, will come to this country this spring with a staff of assistants to make studies along the Hudson and other water basins in an effort to determine the year-by-year retirement of the ice in the glacial period which he has already charted in Sweden.

PART II

(a) *Some Recently Founded Fellowships for American Students Abroad**American-Scandinavian Foundation Fellowships*

20 fellowships (amount of each \$1,000) for the annual interchange of students between the United States and Sweden, ten to Sweden and ten from Sweden.

10 fellowships (amount of each \$1,000) for the annual interchange of students between the United States and Denmark, five to Denmark and five from Denmark.

10 fellowships (amount of each \$1,000) for the annual interchange of students between the United States and Norway, five to Norway and five from Norway.

Applications for these fellowships must be in by the 15th of March of each year.

Information about these fellowships may be obtained by addressing Dr. H. G. Leach, Secretary, The American-Scandinavian Foundation, 25 West 45th Street, New York City.

Amherst Memorial Fellowships

2 fellowships for the study of social, economic and political institutions, at least half of the time to be spent in Europe. \$2,000 each.

Information about these fellowships may be obtained by addressing Mr. Walton H. Hamilton, Secretary of the Committee, Amherst College, Amherst, Massachusetts.

Belgian Fellowships

The Commission for Relief in Belgium is sponsor for an exchange fellowship plan for Belgian students between Belgian and American universities. It has already been arranged that two Belgian students will enter Harvard, Yale, Princeton, Leland Stanford, Jr. and University of California next fall, and that these institutions have the right to nominate two Americans to go to Belgium for a year's study in the Universities of Brussels, Ghent, Liège, Louvain and the School of Mines at Mons. The Fellowship Committee of the Commission is

anxious to place two additional Belgian graduate students in another one of our larger institutions.

The stipends of the fellowships in America will be \$1,000 and in Belgium 10,000 francs, and necessary traveling expenses.

Information about these fellowships may be obtained by addressing Mr. Perrin C. Galpin, Acting Secretary, C. R. B. Fellowship Committee, 115 Broadway, New York City.

French Government Fellowships

The French Government authorizes the selection of twenty American girls for scholarships in leading lycées of France and six American girls for scholarships for graduate work at the École Normale Supérieure de Sèvres and the École Normale de Saint Germain for the academic year 1920-21. They cover fees, room and board.

Information about these fellowships may be obtained by addressing Professor Margaret E. Mattby, 419 West 117th Street, New York City.

Society for American Fellowships in French Universities

25 fellowships to graduates of American colleges are granted for one year and renewable for a second year for advanced study and research in French universities. The annual value of each is \$1,000.

Information about these fellowships may be obtained by addressing Dr. I. L. Kandel, Secretary, 576 Fifth Avenue, New York City.

(b) Fellowships not so recently founded but about which there have been many inquiries

Kahn Foundation for Foreign Travel of American Teachers

The object of this foundation is to enable men of proved intellectual attainments to enjoy during one year or more, sufficient leisure and freedom from all professional pursuits or preoccupations to enter into personal contact with men and countries they might otherwise never have known. The annual stipend of the Kahn Fellowship is \$3,000. The selection of the beneficiaries is left to the Trustees appointed by the Founder in this country.

Information about these fellowships may be obtained by addressing Mr. Frank D. Fackenthal, Secretary, Columbia University, New York City.

Pulitzer Scholarships

3 traveling scholarships to graduates of the School of Journalism, Columbia University.

An annual scholarship to the student of music in America who may be deemed the most talented and deserving, in order that he may continue his studies with the advantage of European instruction.

An annual scholarship to an art student in America, who shall be certified as the most promising and deserving by the National Academy of Design.

Information about these fellowships may be obtained by addressing Mr. Frank D. Fackenthal, Secretary, Columbia University, New York City.

PART III

In reply to the question—"Would you be willing to accept a temporary engagement on the teaching staff of a college or university in the United States, either at an early date, or within the next two or three years?" the following replies have been received:

FROM GREAT BRITAIN

AGRICULTURE

- C. R. Fay, Fellow and Lecturer of Christ's College, Cambridge.
Summer 1921
Social and Economic History of the 19th Century, History of British Agriculture
- C. A. Barber, Christ's College, Cambridge. Summer 1920 or 1921
Tropical Agriculture
Production of Tropical Raw Material
- James Hendrick, University of Aberdeen, Scotland. April to September, 1921 or 1922
Lectures on the Fertilizer Industry and its development or on some other subject connected with fertilizers and their use

BOTANY

- A. C. Seward, Master, Downing College, Cambridge. Summer Session only
The Floras of the Past
The Evolution of Plants
Links with the Past in the Plant World

CLASSICS

- Alexander Souter, D.Litt., University of Aberdeen. March to September in any year
Latin Literature and Language
Greek New Testament, Text and Introduction
- Miss C. Keith, M.A., Classical Tutor, St. Hilda's Hall, Oxford.
Summer Session, July-August 1920
Textual and Literary Criticism
Latin Prose Translation

CHEMISTRY

George Barger, Professor of Chemistry in Relation to Medicine,
Edinburgh

At present and for the next few years, at liberty from about
March 25th to the end of September, July and August preferred.

Would prefer to lecture at several institutions.

Medical Chemistry

Organic Chemistry

Drugs

H. B. Baker, Professor of Chemistry, Imperial College of Science,
London. Not before 1922

Inorganic Chemistry

Unsolved problems in Inorganic Chemistry

FOREIGN AFFAIRS

George Young, King's College, London. One term.

Would prefer to lecture in several places.

The German Revolution

The Balkans

Portugal

The Ottoman Empire and the United States

The League of Nations: International Diplomacy and Democracy.

GEOGRAPHY

F. Debenham, Gonville and Caius College, Cambridge. Summer
1921 or 1922

Surveying or Cartography Exploration

GEOLOGY

Alfred W. Gibb, University of Aberdeen. Summer Session 1921 or
later

Aspects of British Geology

HISTORY

James MacKinnon, Ph.D., D.D., University of Edinburgh. Summer
1921 or 1922

Ecclesiastical History. The Reformation as Directed by Calvin
or the History of Christianity in the 2nd or 3rd Centuries

B. H. Sumner, All Soul's College, Oxford. February-June, 1921.
Summer 1921

West European History

Russian History

- E. L. Woodward, All Soul's College, Oxford. Summer 1921. September–January 1922–23
The History of the Later Roman Empire
European History since Louis XIV
- F. M. Woodward, 11 Holywell, Oxford. Summer 1921. September–January 1922–23
English History—Tudors
English History—Stuarts 18th Century
- Miss Hilda Johnstone, University Reader in History, King's College, London. Summer sessions only, 1923 or 1924
English Medieval History
- Miss Eileen Power, Girton College, Cambridge. September–January 1920. February–August 1921.
English Economic History
Medieval European History
European History, 19th Century
Prefers not to spend entire time in one university. Would give courses of six lectures on (1) Medieval Women, (2) Chaucer's Prologue in Real Life, (3) Medieval Monasticism
- M. Cary, University College, London. Summer Session.
English History, Ecclesiastical or Constitutional in the 14th and 16th Centuries
The Political Ideal of the Middle Ages

LITERATURE

- B. W. Downs, M.A., Lecturer in Medieval and Modern Languages, Christ's College, Cambridge. September–January 1922–23
English Literature
Eighteenth Century Prose
Tragedy in Medieval and Modern Times
- I. G. Robertson, Professor of German, University of London
German Literature (16th to 18th Century) or General Problems of Comparative Literature in the Eighteenth Century
- Miss Eleanor F. Jourdain, St. Hugh's College, Oxford. Summer Session.
French Philosophy and Literature
- G. Milligan, University of Glasgow. Summer Session, next two or three years
New Testament Language and Literature with special reference to recent papyrus discoveries

Alfred J. Wyatt, Emmanuel College, Cambridge. Summer Session
1921

William Morris

Chaucer-Dickens

Shakespeare

The Eighteenth Century

LOGIC

Dr. A. Wolf, Reader in Logic and Ethics, University College, London.

One term or a whole session. Would like a year's notice

Logic

Philosophy

History of Science

Miss Helen Wodehouse, Professor of Education, University of

Bristol. Cannot be absent from Bristol more than one term

Logic

Ethics

General Psychology

Principles and Problems of Education

MACHINERY

L. P. Smith, City and Guilds Engineering College, London. Summer Session

Electrical Machinery

MATHEMATICS

Edgar Girard C. Poole, Queen's College, Oxford. Any time after
March 1921

PATHOLOGY

L. S. Dudgeon, Professor of Pathology, St. Thomas's Hospital

Medical School, London. June and July, 1921

Bacteriology, especially in relation to Medicine

PHARMACOLOGY

Arthur R. Cushing, University of Edinburgh. April-June, 1922-23

PHYSIOLOGY

W. M. Bayliss, Professor of General Physiology, University College,
London. Summer Session

A. V. Hill, University of Manchester. Summer Session

Muscular Contraction

Application of Physics to Vital Phenomena

PSYCHOLOGY

C. E. Spearman, University College, London. Summer Session
 Differential Psychology
 Mental Energy
 The New Psychology on Principles

PHYSICS

C. A. Darwin, Christ's College, Cambridge. February-June, 1923
 Mathematical Physics

TELEGRAPHY

George William Osborn Howe, Assistant Professor of Electrical
 Engineering, Imperial College, London. Summer Session
 Radio-telegraphy

FROM FRANCE

PROFESSOR L. HACKSPILL

Université de Strasbourg
 Institut Chimique

Je serais heureux d'aller faire une série de conférences aux Etats-Unis de Septembre 1921 à Janvier 1922.

Professeur de chimie minérale et industrielle, je pourrais faire dans chaque centre universitaire que je visiterais deux ou trois leçons sur les métaux alcalins et alcalino-terreux que j'ai spécialement étudiés au laboratoire, et quatre ou cinq leçons sur la fixation de l'azote atmosphérique et la fabrication des engrais azotés, question que j'ai toujours suivie de très près, en particulier en qualité de contrôleur des usines des territoires Rhénans de Janvier à Juillet 1919. Ces deux sujets intéresseraient plutôt des étudiants assez avancés que des débutants.

Enfin je dois ajouter que je ne parle pas l'anglais, je comprends lorsqu'on me parle lentement et suis capable de lire un ouvrage scientifique anglais.

PROFESSOR GRAMMONT . . . Professeur de Grammaire comparée et de Linguistique générale à la Faculté des Lettres de l'Université de Montpellier

Je serais disposé à aller faire au mois de Septembre prochain une tournée de conférences dans un certain nombre d'Universités des Etats-Unis.

Voici approximativement quels pourraient en être les sujets :

- La poésie française (Victor Hugo)
- La poésie française (Alfred de Musset)
- Le phonème et la syllabe (conférence technique)
- Les phases successives des évolutions phonétiques (conférence technique)
- Le rythme du vers français comparé à celui de la prose française
- Le mouvement musical de la phrase française
- Le rejet dans la versification française

En voilà sept parmi lesquels on pourrait choisir. Je pense que six suffiraient pour chaque Université.

Je dois faire observer qu'aucune de ces conférences n'a pour objet d'exposer des notions connues ou courantes; mais qu'elles reposent toutes uniquement sur mes travaux personnels et qu'elles sont *absolument neuves*, comme les cinq premières, sur lesquelles je n'ai encore rien publié—ou en grande partie neuves, comme les deux dernières qui reposent sur des travaux que je n'ai encore publiés que partiellement.

Je parle l'anglais, mais pas très bien, et en tout cas pas assez bien pour donner une conférence en anglais.

PROFESSOR GEORGES MILLARDET . . . Professeur de Langues et Littératures Romanes, à la Faculté des Lettres de Montpellier

Je suis prêt à accepter, à bref délai ou dans une période comprise dans les trois prochaines années, un engagement temporaire de trois ou quatre mois, de préférence à partir de Septembre, dans une Université ou Collège.

De préférence en Californie; mais aussi ailleurs dans l'Ouest, l'Est, ou le Centre.

Matières de mon enseignement: Linguistique romane (particulièrement français, provençal, espagnol); dialectologie de la Gaule romane. Littératures romanes (spécialement française et provençale, particulièrement du moyen-âge). Grammaire historique du Français (époques ancienne et moderne). Phonétique expérimentale; prononciation et orthoépie.

Je saurai parler anglais, mais pas suffisamment pour donner un enseignement en anglais.

Dr. L. M. PAUTRIER Professeur de clinique des
Maladies cutanées et syphili-
tiques
Faculté de Strasbourg
Strasbourg

J'accepterais volontiers, dans un délai de 1 à 3 ans, une mission de
6 à 8 semaines, pendant la session d'été, Juillet-Septembre, dans une
université américaine (entre le 10 Juillet et le 1^{er} Octobre)

Branche spéciale enseignée: Dermatologie-Vénérologie

Je parle l'anglais assez couramment.

FROM INDIA

Dr. Gilbert Slater, Professor of Economics in the University of
Madras. Will lecture during May and the Summer Session, 1921
Indian Economics

Professor S. L. Joshi, The College, Baroda, India. Wishes a per-
manent position
History, Literature, and Culture of India

Addenda. Part III.

PUBLIC HEALTH

Miss Eileen O'Brien
Bedford College, London University
Sanitary Inspector with the Serbiar
Fund in Serbia, 1919-1920.
September 1920 or July and August,
Would prefer to lecture in several
Practical Sanitation for Women.

PART IV

In reply to the questions:

1. Will you be willing to receive American graduate students in the coming academic year, and if so, how many?
2. What research work, if any, will you offer during the coming academic year for American graduate students, and in what subjects?

we have received the following answers:

OXFORD UNIVERSITY

Magdalen College

1. I regret that this is not possible in the coming academic year."

Exeter College

1. "Yes, we could receive six graduate students."
2. "Work for Bachelor of Letters or Science or for Ph.D. Degree."

Trinity College

1. "No, we have no room in college, being already much over our proper numbers."

St. John's College

1. "This must depend upon circumstances. In any event we have no vacancies before October and I cannot promise anything for that date."

Keble College

1. "With the pressure on our rooms we could not receive such students in the coming year; we should be glad to be asked the question again in future years."

Lincoln College

1. "Yes, if we have vacancies, but it is not possible yet to foresee how many."

All Soul's College

1. "Yes."
2. "Roman Law."

CAMBRIDGE UNIVERSITY

King's College

1. "Yes, a limited number."
2. "Research work in all branches of Theology and History."

The School of Slavonics would be happy to receive American students and offers research in Slavonic languages, literature, history and economics."

Pembroke College

- I. "No."

Clare College

- I. "Yes."

Downing College

- I. "We shall be glad to receive two."
2. "Law, Botany and Medical subjects."

Christ's College

- I. "We have already accepted two or three American students for research work, but owing to the appallingly overcrowded state of our College we most regretfully cannot take more."

St. John's College

- I. "We are willing to accept two students out of those who apply to us; subject to the usual conditions as to research students."
2. "In any subject for which provision can be made in the University."

Corpus Christi College

- I. "Fifteen to twenty students."
2. "Facilities for research work in Hygienics and Public Health, in Sanitary Science and Water Sewage, Food Stuffs, etc."

Gonville and Caius College

- I. "Yes."
2. "Comparative and Psychological Study of Religion, History and Archaeology of the Ancient Near East. Old Testament Criticism, Semitic Transcriptions and Comparative Grammar."

Trinity College

- I. "Yes."
2. "Two students in research work in Zoology, Engineering, Classics, Law."

Emmanuel College

- I. "Yes."
2. "Research work in any subject recognized by the University. But the University Laboratories of Engineering, Physics and

Chemistry will be much overcrowded for the next year. Others which will be very full are Botany, Agriculture and Physiology. This state of things arises from the war and will not be permanent."

Cambridge University Training College for Schoolmasters

1. "Yes."
2. "Types of English Schools. The Education Acts. Students can only be received if they are able to make all arrangements as to residence rooms, etc., for themselves, as this college has no hostel system. It is also desirable, if not essential, that the students should join a college."

School of Agriculture

1. "Yes, two or four."
2. "Normal and pathological metabolism in animals in connection with agriculture. Metabolism of bacteria."

UNIVERSITY OF LONDON

St. John's Hall

1. "Yes."
2. "Philosophy, Hebrew, Classics."

King's College

1. "Yes."
2. "History of Education."

Francis Galton Laboratory

1. "Yes, up to eight postgraduates, four undergraduates."
2. "Eugenics, Statistical Theory."

University College. Sir Gregory Foster, the Provost writes:

1. "Yes. Say fifty, if distributed among the several departments."
2. "Research work is provided in every department of the College."

Institute of Physiology

1. "Two or three."
2. "Research according to wishes and ability."

New College

1. "Yes, not more than four."
2. "The Professors will guide the reading of students who take the M.A. or the Ph.D. of London University."

Imperial College of Science and Technology

1. "Yes."
2. "Research work in Plant Physiology; Astronomical or General Spectroscopy; Cytology or Physiology of plants; Nitrogen Fixation; Velocity of Detonation of High Explosives; Energy Balances of High Explosives; Economic Entomology; Technology, etc., of wood; Forest Botany; Geology, field or economic; Paleontological research."

City and Guilds Engineering College

1. "Yes, a total of eight. Four in Electrical Machinery Design and four in Radio-telegraphy."

London School of Economics

1. "The London School of Economics does not wish to limit the number of qualified students whom it would be glad to welcome."
2. "In all subjects within the scope of the Faculty of Economics and Political Science, including Commerce and Industry."

Birkbeck College

1. "Yes, any number up to say, fifteen or twenty."
2. "Preferably in Science, including Chemistry, Physics and Botany."

UNIVERSITY OF BRISTOL

1. "Yes, but the number will depend on the date at which they apply. Our accommodation is crowded at present, but will be considerably extended by next October."
2. "Research in Physics, Chemistry, Geology, Botany, Zoology, Physiology, Human Morphology, Embryology, Pathology, Bacteriology, and various branches of Engineering, as well as in Experimental Psychology."

UNIVERSITY OF MANCHESTER

1. "Yes."
2. "Physics, research in Spectroscopy; Germanic Philology and Old Germanic Literature; Bacteriology, Serology, General Pathology, and Morbid Histology, especially in connection with Complement Toxation and the Wassermann Reaction."

UNIVERSITY OF EDINBURGH

1. "Yes."
2. "British History, or Modern European History (17th, 18th and 19th Centuries); Astronomy; General Philosophy, History of Philosophy; Mathematics, chiefly Theory of Functions and Differential Equations and Mathematical Laboratory work, leading to the Ph.D., D.Sc. degrees of the University."

UNIVERSITY OF GLASGOW

1. "Yes."
2. "Research in Chemistry—organic, inorganic or physical; Metaphysics; Economics, etc."

Royal Technical College, Glasgow

1. "No. The great influx of students will prevent the reception of American graduate students in the coming academic year."

DURHAM UNIVERSITY

Affiliated Colleges. 1. "Yes."

FACILITIES FOR MEDICAL RESEARCH

Hospital for Epilepsy and Paralysis, Maida Vale.

1. "Yes."
2. "Neurology and Psychology."

National Hospital for Paralysed and Epileptic, Queen Square, London, W. C.

1. "Yes, twenty."
2. "Research work in Neurological Pathology."

Queen Charlotte's Hospital, Marylebone, N. W.

1. "Yes."

Margaret Street Hospital for Consumption, 26 Margaret Street, W. London.

1. "Yes."

London (Royal Free Hospital) School of Medicine for Women, S. Hunter Street, W. C. 1.

1. "Yes, five."
2. "Physiology and Pathology."

The Cancer Hospital, Fulham Road, S. W. 3.

1. "Yes, fifty."
2. "Research in Cancer and of Radio-activity and its Applications."

City of London Hospital, 86 Harley Street, W.

1. "Yes."

St. Thomas's Hospital, Albert Embankment, Westminster, S. W. 1,

1. "Yes, ten."
2. "Any subject desired."

National Hospital for Disease of the Heart, Westmoreland Street, London, W. 1.

1. "Yes."

London School of Tropical Medicine.

1. "Yes."

Royal Westminster Ophthalmic Hospital.

1. "About twelve."
2. "Pathology."

Royal National Orthopedic Hospital.

1. "Yes."

The Samaritan Free Hospital.

1. "Yes."
2. "Chemistry."

London Temperance Hospital, Hampstead Road, London, N. W.

1. "Yes, three."
2. "Clinic in Oto-Laryngology."

The London Lock Hospital.

1. "Yes, up to fifty."

Victoria Hospital for Children.

1. "Yes."

City of London Hospital for Diseases of the Chest, Victoria, N. E.

1. "Yes, two."
2. "Phthisic and other lung diseases."

The University of Strasbourg sends the following invitation to Americans:

"We shall be ready during the summer vacation to welcome here and to accommodate any number of students wishing to avail themselves of the opportunity offered for studying French, German, European literature and history. Special courses for undergraduates will be organized. There will also be courses for advanced students able to follow French courses in letters, chemistry and physics, medicine and surgery, geology, botanics, etc."
